

**Uzmanību!**

Siltumnīcas karkass paredzēts montēšanai uz pamatiem. Ziemas sezonā sniega sega no siltumnīcas jumta ir jānotīra un, ja nepieciešams, jāuzstāda pagaidu koka atbalsta sijas.

**Attention!**

The frame of the greenhouse is intended for mounting on foundations. During the winter season, the snow cover should be cleared from the roof of the greenhouse and, if necessary, temporary wooden support beams should be installed.
